

Session thirteen of sixteen: Instrument Knowledge and Skills

Every year dozens of VFR only rated OR non-current (or non-proficient) IFR pilots become part of the accident statistic data. Human Factors is a critical cause of these occurrences. Weather (WX) is a critical factor as well. Aviation Training Curriculum invites you to join in learning vital skills that could save your life and improve your airmanship and decision making during this 16 part free 'weekly' seminar series. For additional details and fees on signing up for either the FULL gnd & flt course or gnd only course Contact Paul Weihs @ (408) 607-6078 or paul.weihs@AviationTrainingCurriculum.com

Directions: US-101 exit Embarcadero Rd. Northbound

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
